This class will explore the transformative role women play in promoting prosperity and human progress through technology and innovation, shining a light on the remarkable women who are building companies and technologies that transform the way we live and work, and who are paving new paths for female entrepreneurship and gender equality. It will also look at the challenges that women in tech continue to face, including sexism, gender discrimination, unconscious bias, and impostor syndrome.
For questions, contact Prof. Daniel Lopresti (dal9@lehigh.edu).
