Preface	xv
Acknowledgments	xvii
Author Biographies	xix
Chapter 1 INTRODUCTION TO WIRELESS COMMUNICATIONS.....	1
1. INTRODUCTION.....	1
1.1 Technology Evolution	1
1.1.1 Basic Principles	2
1.1.2 Multiple Access Technique	2
1.1.3 System Implementations	3
1.2 Techniques in Wireless Communications	6
1.2.1 Power Control.....	6
1.2.2 Soft Handoff.....	8
1.2.3 Adaptive Modulation and Coding	9
1.2.4 Space–Time Coding and Multiuser Diversity	10
1.3 Summary	10
1.4 References	11
Chapter 2 INTRODUCTION TO WIRELESS SYSTEMS.....	13
2. INTRODUCTION.....	13
2.1 Generic Wireless System Architecture	14
2.1.1 Registration and Call Initiation	15

2.1.2	Mobility Management	16
2.1.3	Call Delivery	16
2.1.4	Handoff.....	17
2.2	Traffic Routing in Wireless Networks	17
2.3	First- and Second-Generation Cellular Radio Network.....	18
2.4	Deficiencies of First- and Second-Generation Wireless Systems	20
2.5	Second-Generation Cellular Networks Offering Wireless Data Services	21
2.6	Third-Generation Wireless Networks and Wireless LANs.....	22
2.7	Transport Choices for Wireless Backhaul Networks	24
2.8	End-to-End Protocol Stack.....	28
2.8.1	Circuit Switched Service	28
2.8.2	Packet Data Service.....	29
2.9	RLC/MAC Functions	30
2.10	Review Exercises	35
2.11	References.....	36
Chapter 3 INTRODUCTION TO TRAFFIC ENGINEERING.....		39
3.	INTRODUCTION.....	39
3.1	QoS Requirements of Internet Applications	40
3.2	UMTS QoS Classes	41
3.2.1	Conversational Class	43
3.2.2	Streaming Class	43
3.2.3	Interactive Class	43
3.2.4	Background Class.....	44
3.3	QoS Engineering	44
3.4	Traffic Modeling	47
3.4.1	Traffic Model Framework	50
3.4.2	Methodology for Traffic Characterization	52
3.5	Review Exercises	59
3.6	References.....	59
Chapter 4 OVERVIEW OF CDMA2000/UMTS ARCHITECTURE.....		61
4.	INTRODUCTION.....	61
4.1	Evolution of CDMA2000 Standards.....	62
4.2	Overview of CDMA2000 3G1x Network Architecture	63
4.3	Overview of CDMA2000 1xEV-DO Network	

Architecture.....	66
4.4 Overview of 3GPP Standards Evolution.....	67
4.5 Overview of UMTS R99/4 Network Architecture.....	68
4.5.1 UTRAN Components.....	70
4.5.2 General Protocol Model for UTRAN Terrestrial Interfaces.....	72
4.5.3 Core Network Components.....	80
4.5.4 General Protocol Model for CN Interfaces.....	83
4.6 Mobility Management.....	84
4.6.1 Circuit-Switched Services.....	85
4.6.2 Packet Services.....	86
4.7 Review Exercises.....	88
4.8 References.....	89
 Chapter 5 AIR INTERFACE PERFORMANCE AND CAPACITY ANALYSIS.....	 91
5. CAPACITY ANALYSIS AND EVALUATION.....	91
5.1 Queuing Analysis in a Wireless Communication System.....	91
5.1.1 Call Arrival Process.....	91
5.1.2 Birth–Death Process.....	93
5.1.3 Lost Call Cleared and Lost Call Held.....	94
5.2 Erlang Capacity for Circuit-Switched Services.....	96
5.2.1 Capacity Analysis on Reverse Link.....	96
5.2.2 Capacity Analysis on Forward Link.....	105
5.3 Capacity for Packet Switched Services.....	111
5.4 Simulation Methodologies for Capacity Evaluation.....	112
5.4.1 System Level Simulation Assumptions for Forward Link.....	112
5.4.2 System Level Simulation Assumptions for Reverse Link.....	115
5.4.3 Performance Criteria and Output Metrics.....	118
5.5 Comparison of Analytical Models with Simulations.....	119
5.5.1 Comparison of Analytical and Simulation Results on Reverse Link.....	120
5.5.2 Comparison of Analytical and Simulation Results on Forward Link.....	124
5.6 Review Exercises.....	127
5.7 References.....	127

Chapter 6 DESIGN AND TRAFFIC ENGINEERING OF A BASE STATION.....	129
6. BASE STATION DESIGN	129
6.1 UMTS Base Station Design	130
6.1.1 CPU Budget for Various Component Cards in NodeB ..	130
6.1.2 Iub Interface Capacity	141
6.2 Capacity Evaluation and Resource Management of 1xEV-DO Base Stations	148
6.2.1 1xEV-DO Base Station Architecture.....	148
6.2.2 Processor Occupancy Analysis.....	149
6.2.3 Processor Performance Enhancements	155
6.3 Review Exercises	158
6.4 References	158
Chapter 7 RNC AND RADIO ACCESS NETWORKS DESIGN AND TRAFFIC ENGINEERING	159
7. INTRODUCTION.....	159
7.1 RNC Design	159
7.1.1 Overview of Generic RNC Hardware Architecture	160
7.1.2 RNC Capacity.....	160
7.1.3 Traffic Model Revisited	162
7.1.4 Impacts of RAB Inactivity Timer Value on Signaling Traffic and Power Consumption	172
7.1.5 Radio Resource Management.....	174
7.2 Techniques for Improving OPEX/CAPEX of UMTS RAN	181
7.3 Review Exercises	188
7.4 References	189
Chapter 8 CORE NETWORK DESIGN AND TRAFFIC ENGINEERING	191
8. INTRODUCTION.....	191
8.1 Registering and Activating the Circuit/Packet Switched Service	192
8.1.1 Routing Area Update	194
8.1.2 Activating a Packet Data Session	195
8.1.3 Receiving a CS Domain Call.....	196
8.2 SGSN	196
8.3 GGSN.....	200
8.4 GPRS/UMTS GTP Tunnel.....	200

8.5	Capacity Sizing of SGSN/GGSN.....	202
8.5.1	Signaling Load Estimate.....	203
8.6	Overload Control Strategy	208
8.7	Scheduling/Buffer Strategies	211
8.7.1	Scheduling Algorithms.....	211
8.7.2	Buffer Management Schemes.....	213
8.7.3	Performance Evaluations of Different Scheduling/Buffer Management Schemes.....	215
8.8	Distributed/Centralized Core Network Design	219
8.9	Review Exercises	222
8.10	References.....	223
Chapter 9 END-TO-END PERFORMANCE IN 3G NETWORKS		225
9.	INTRODUCTION.....	225
9.1	Call Setup Delay for Circuit Switched Service.....	225
9.1.1	Delay Analysis of the Call Setup Procedure	227
9.1.2	End-to-End Delay Analysis for Voice Bearer	229
9.2	End-to-End TCP Throughput in 3G Networks	237
9.2.1	Simple Analytical Model for Studying RLC Performance.....	241
9.2.2	Analytical Model of RLC.....	242
9.2.3	Simulation Studies of RLC/MAC Performance	246
9.2.4	Deadlock Avoidance in RLC.....	248
9.3	Recommendations of TCP Configuration Parameters over 3G Wireless Networks.....	250
9.4	Some Proposed Techniques to Improve TCP/IP Performance in 3G Networks.....	252
9.5	Review Exercises	254
9.6	References.....	254
Chapter 10 OVERVIEW OF WIRELESS LAN		257
10.	INTRODUCTION.....	257
10.1	Overview of 802.11 Wireless LAN	259
10.1.1	Wireless LAN Architecture and Configurations.....	259
10.1.2	802.11b.....	260
10.1.3	802.11a.....	262
10.1.4	802.11g.....	264
10.2	802.11 Physical Layer.....	266
10.3	Capacity and Performance of 802.11 System	267
10.3.1	Coverage and Throughput Performance	267
10.3.2	Impact of Co-Channel Interference on	

	System Capacity.....	270
10.3.3	Performance of Mixed 802.11g and 802.11b Systems	273
10.4	802.16 and Future Wireless LAN Technology	276
10.5	Review Exercises.....	277
10.6	References.....	277
Chapter 11 MAC AND QOS IN 802.11 NETWORKS		279
11.	INTRODUCTION.....	279
11.1	802.11 Distributed Coordination Function	280
11.2	802.11 Point Coordination Function.....	283
11.3	Performance Evaluation of 802.11 DCF for Data Users	285
11.3.1	Performance Evaluation of 802.11b DCF.....	285
11.3.2	Understanding TCP Fairness in WLAN	289
11.4	Supporting Voice Services in 802.11b WLANs	290
11.5	802.11e: Quality of Service in Wireless LAN	294
11.6	Other Related MACs	297
11.6.1	Outdoor IEEE 802.11-Based Cellular Network.....	298
11.6.2	802.15.3 MAC.....	299
11.7	Review Exercises.....	300
11.8	References.....	301
Chapter 12 UPCOMING FEATURES FOR 3G NETWORKS		303
12.	INTRODUCTION.....	303
12.1	IP Multimedia Subsystem (IMS)	304
12.2	Multicast/Broadcast Services.....	310
12.2.1	Multicast/Broadcast Design for CDMA2000.....	310
12.2.2	Multicast/Broadcast Design for UMTS	315
12.3	Push-to-Talk Over Cellular (PoC)	321
12.3.1	An Example of SIP Call Flow for a PoC Session	323
12.4	Review Exercises.....	325
12.5	References.....	325
Appendix INTRODUCTION TO PROBABILITIES AND RANDOM PROCESS.....		327
A.1	The Basic Concept of probability	329
A.2	Random variable and random process	330
A.2.1	The Concept of a Random Variable	330
A.2.2	Distribution and Density Function	331
A.2.3	The Density Function	332

A.2.4	Moments and Conditional Distributions	332
A.2.5	The Concept of a Random Process.....	336
A.3	Common Distributions of Random Variables and Processes	337
A.3.1	Normal or Gaussian Distribution.....	337
A.3.2	Log-Normal Distribution.....	338
A.3.3	Uniform Distribution	339
A.3.4	Binomial Distribution.....	339
A.3.5	Poisson Distribution	339
A.3.6	Chi-Square Distribution	341
A.3.7	Rayleigh Distribution	341
A.3.8	Rician Distribution	344
A.4	Review Exercises.....	344
A.5	References.....	345
Index	347
