Given: Jan 22, 2007
Due: Jan 29, 2007, before class

1. Read and study Chapter 1 (Pages 51-96) in text.

2. Do problems: (page 96-101)
   1.1-1, 1.1-2, 1.1-3, 1.1-6, 1.3-1, 1.3-2, 1.4-4, 1.4-5, 1.5-1, 1.7-1

NOTE:

   Students should be aware that this course moves very quickly and is math intensive. You must study at least 2 hours per night (equivalently 12 hours per week) to keep up with the pace of the course.

   The homework problems will be from the textbook. Quizzes, the midterm and the final will have problems very similar to homework problems. It is very important for you to do the homeworks and study the examples in the textbook.
