Course or Curriculum Development (since joining Lehigh)

- When I first arrived at Lehigh, I revamped our teaching of operating systems (CSE 303) and taught the course a number of times before it was taken over by a newer faculty member. I then developed a new course on bioinformatics algorithms and taught it several times on an experimental basis; it is now a regular offering by the department (CSE 308/408), and was taken over by a colleague. This course is also cross-listed as an elective in the undergraduate Bioengineering program. In Spring 2007, I introduced a new course, titled “Intelligent Machine: The Computer in Popular Culture,” which was designed to attract a broad range of students, not just CSE majors. I am also involved as a regular guest lecturer in an innovative survey course in the Life Sciences (BioS 095) as a result of HHMI support Lehigh has received over the years, which was taught for the first time in Fall 2007. In Spring 2008, I introduced another novel course named “Computing in My Country,” a seminar that was aimed both at highlighting important advances in the field that are taking place outside of the United States as well as developing communication skills in our graduate students. In Fall 2008, I led a special topics course on electronic voting

timed to coincide with the presidential election that year. In Fall 2015, I offered a new seminar course on cybersecurity that integrated technological, business, and policy issues. For Spring 2016, I developed a new course on big data analytics using Apache Spark and the Scala programming language, which has continued each Spring since then. For Spring 2017, I co-developed a new course on Women in Technology working with Samantha Kahoe from Lehigh and Tom Gillis, the co-founder and CEO of Bracket Computing, which was again repeated in 2018, along with a new course on Software Product Management. Both of these courses made extensive use of a new telepresence room we created during the renovation of Mountaintop Building C, linking us with guest speakers who were experts in their areas in Silicon Valley. I also developed and lead the Software Engineering Track for the highly successful Lehigh Silicon Valley Program (LSV++). For 2018, we visited Lawrence Livermore National Laboratory, OS/soft, Adobe, Cisco, Google, Plug & Play Tech Center, and Bracket Computing.

** CCC was established in 2006 in response to an NSF solicitation indicating a desire to establish a Computing Community Consortium. The CCC proposal received letters of support from 132 Ph.D.-granting academic programs, 16 leading corporations, seven major national laboratories and research centers, and five professional societies*

in the field. CCC operates through a cooperative agreement between NSF and CRA, the Computing Research Association. Today, the CCC Council has 20 members serving 3-year staggered terms, representing the diverse nature of the computing research field. The mission of the CCC is to enable the pursuit of innovative, high-impact computing research that aligns with pressing national and global challenges.

CCC is a major programmatic committee of the CRA, which has origins dating back to 1972 as the Computer Science Board. CRA counts among its members more than 200 North American organizations active in computing research: academic departments of computer science and computer engineering; laboratories and centers in industry, government, and academia; and affiliated professional societies (AAAI, ACM, CACS/AIC, IEEE Computer Society, SIAM, and USENIX).

There are over 30,000 living graduate alumni, representing 30% of Princeton's total alumni body. The APGA connects and supports graduate alumni in scholarship, fellowship, and leadership, in the Nation's service and the service of humanity. The Governing Board of the APGA is responsible for developing, promoting, and executing APGA programs with the help of committee volunteers. To recognize the distinction of Graduate School alumni and parallel the undergraduate alumni presence at Alumni Day, the APGA established the James Madison Medal. First awarded in 1973, the Madison Medal recognizes an alumnus of the Graduate School who has had a distinguished career, advanced graduate education, and/or public service. At the same time the APGA continues to serve graduate alumni, it has also increased its support of current graduate students.*
