CSE 498  Artificial Intelligence: Concepts, Issues, and Algorithms  
Spring 2024  •  Section 040  •  Professor Daniel Lopresti  
Time TBD TuTh  •  Room TBD

Syllabus

Description  This course provides a broad and deep overview of the field of artificial intelligence. Over the semester we will cover the theory and application of some of AI’s most important underlying concepts, including AI agents, search, games, uncertainty and utility, Markov Decision Processes, reinforcement learning, Bayes’ Nets, Hidden Markov Models, linear classifiers, neural networks, clustering, and decision trees. The ethics and implications of AI will be a constant theme throughout the course. Selected advanced topics will be discussed and will form the basis for the final project.

Prerequisites: CSE 17 and CSE 140 (or CSE 261) or permission of the instructor. This course is not open to students who have already received credit for CSE 327.

Instructor  Professor Daniel Lopresti  
Email dal9@lehigh.edu  ~  Ext 85782  
Office Hours 2:00 pm – 3:00 pm on Wednesdays (or by appointment) via Zoom

Teaching Assistant  TBD

Grading Assistants  TBD

CourseSite  Course materials and discussion forums will be available @ http://coursesite.lehigh.edu/

Grading  
- Homework assignments  TBD  
- Take-home exams  TBD  
- Final project  TBD

---

1 It is planned that CSE 498 will meet in person. However, Zoom access will be allowed for those who receive permission from the instructor due to illness. Lectures will also be recorded and made available for later viewing on CourseSite.

2 See CourseSite for Zoom URLs.
**Homework Policy**

All aspects of homework assignments will be handled via CourseSite. The following is our due date policy:

- No late penalty if submitted by the deadline on the due date.
- Homework submitted after this deadline but less than 24 hours late will lose 10 points.
- Homework submitted more than 24 hours but less than 48 hours late will lose 20 points.
- Homework submitted later than this will not be graded and will receive a zero.

This strict policy enables the course to be fair to all students, and for homework to be returned early enough for you to use the feedback to prepare for exams. No exceptions will be made.

CourseSite enforces strict deadlines, so please verify that your work has actually been uploaded (forgetting to click “Submit” is a frequent error). Failure to upload successfully is not a valid excuse for late work.

Students are advised to back up their files to the university-supported H drive, a USB drive, cloud service, and/or an external hard disk on a regular basis. Because the H drive is easily accessible as a backup, failure of one’s personal machine is not an acceptable excuse for late work. There are numerous university and departmental labs available to you as an alternative if your personal machine should fail.

**Exams**

Take-home exams will be based on the material covered in lectures and the assigned readings. Makeups will be considered only for extreme circumstances. Any make-up requests will be handled on a case-by-case basis, with no guarantees, and will require evidence of your hardship.

**Final Project**

A final project will be required in the course. This can consist of implementing and evaluating an AI system, or writing a more traditional research paper. Further details will be provided at a later date.

**Collaboration Policy**

Unless explicitly stated in the problem specification, all homework assignments and exams are to be an individual effort. You are encouraged to discuss assignments with one another, your friends, and with the instructor and graders for the course. Indeed, this may be the most effective method of learning. You may share concepts, approaches, and strategies for producing a solution. However, all work submitted in your name must be your own. You may not copy in whole or in part from another student. You may not copy from a website unless explicitly permitted for the assignment in question. Violations will be considered as cases of academic dishonesty and referred to the University Committee on Discipline. If you are found guilty, you may be given the failing grade WF in the course.

If any aspect of this policy is not clear, do not make assumptions; consult with the instructor.

**Students with Disabilities**

If you have a disability for which you are or may be requesting accommodations, please contact both your instructor and Disability Support Services, Williams Hall, Suite 301, phone 610-758-4152, or indss@lehigh.edu, or https://studentaffairs.lehigh.edu/disabilities as early as possible in the semester. You must have documentation from Disability Support Services before accommodations can be granted.

**Principles of Our Equitable Community**

Lehigh University endorses The Principles of Our Equitable Community. We expect each member of this class to acknowledge and practice these Principles. Respect for each other and for differing viewpoints is a vital component of the learning environment inside and outside the classroom.
